THE LEADING
TECHNOLOGIES FOR A
SUSTAINABLE TOMORROW

Our goal is to make a difference by designing a better future through innovative and sustainable technologies that aim to improve quality of life and reduce environmental impact.

WHAT WE DO

Energy Management as a service

Do you want to gain control of your energy use and achieve improved performance by turning energy data into actionable insights?

With a perfect blend of hardware, software and consultancy we can give you a complete energy strategy, control, and that competitive edge.

Building Automation

Hardware and software solutions for monitoring and management of energy consumption and HVAC systems, database and data analysis.

Air Quality Management

Hardware and software solutions for indoor air quality monitoring and management for a healthy, safe and comfortable environment with low energy consumption.

We had the ambition to grow from a Spin Off of the University "La Sapienza", to become one of the **leading companies in building automation on the international scene**. We provide you with a technology that can improve the sustainability of your business.

CONTROL YOUR CONSUMPTION AND REDUCE ENERGY BILLS

What you can achieve with the OVER System

- 1 GUARANTEED SAVING**
We guarantee IPMVP[®]-certified savings: if we don't achieve it, we refund the difference.
- 2 ENERGY MANAGEMENT**
An energy manager will guide you in saving strategies and selecting the best energy rate to minimize your bill based on consumption.
- 3 BILL CHECK TOOL INTEGRATION**
Integration with control systems to provide you with the correct information on your energy bills.
- 4 TURNKEY SOLUTION**
We offer you the OVER solution that is fully adaptable to your needs to monitor and govern any of your properties.

Improve your **ESG rating** and achieve average in energy savings of

15%*

*Calculated from average savings of 3000 buildings equipped with the OVER system.

THE STEPS TO ACHIEVE SAVINGS

REDUCE CONSUMPTION AND IMPROVE INDOOR AIR QUALITY

AirFrame[®]

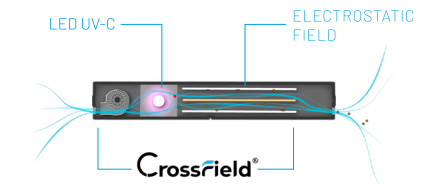

OUR REVOLUTIONARY **AIR PURIFIER**
Scan the QR-code and find out more

The only filterless device that attracts and destroys particulates that commercial filters cannot.

OVERBOARD SOFTWARE GIVES YOU A SMART VIEW

AirFrame[®] with CrossField[®] technology can improve your health and quality of life. It eliminates 99.9% of particulate matter, allergens, viruses, bacteria, fungi and mould in the air. AirFrame[®] is design to be superior in terms of technology, design and ease of use.

Thanks to its **patented requested and certified CrossField[®] technology**, it can capture even ultrafine particles such as PM 0.1, bacteria, flu viruses and SARS-COVID19.

ADAPT AIRFRAME[®] TO YOUR STYLE WITH **CUSTOM COVERS**
